I'll check with ORC and see how they want to handle this since this one is being managed from up here.

thanks

We need an attorney as well. I would like to send an 104E letter to PRIDCO. We have a manifest showing that they disposed of PCE waste from one of their buildings but they did not provided the info during the pre-remedial work.

I've already spoken to Jeff Catanzarita of ERT who is willing to help out with this work. We should set up a conf. call with him to go over what we have, what they can do and when he's available. It'll take a while to negotiate the work plan and budget with CDM so we can get ERT to fill in during that time.

ERT that would be great. How do we get them involve?

We can start sampling and doing as much leg work as we can w/ERT. I heard that CDM has experience dealing with sites on a fast track and that they are very good at it. Plus they have an Office in PR.

I'm ready.

is there someone else? I thought we could get ERT to do some sampling while the documents are being negotiated so that we would have a head start once the contractor is in place.

Helen
CERCLIS shows that \$300,000 has been allocated to this site. I'm working on the IGCE. HQ has requested us to fast track this site.

Here is the information you asked to start the COI process. Please let me know if you need anything else or if I need to provide more details.

CERCLIS ID No. PRN000206319

Site Address: Calle Barbosa, Cabo Rojo Puerto Rico

Ana Maria well: Latitude: 18° 05' 26.61" North (18.09073°) Longitude: 67° 08' 53.97" West (-67.14832°). The street address identifies the nearest intersection to the Ana Maria well. The Ana Maria well is located approximately 660 feet (0.12 mile) northwest of the intersection of Calle Barbosa within the Ana Maria Urbanization - adjacent to the high school. The coordinates of the Club de Leones well are 18.09399° latitude and -67.13328° longitude.

Site history:

The Cabo Rojo Ground Water Contamination site consists of a ground water plume with no identified source(s) of contamination. It is located in the municipality of Cabo Rojo in southwestern Puerto Rico. The reference points for the site are the two wells with an observed release of contamination, Ana Maria and Club de Leones. The Cabo Rojo Urbano public water system consists of six wells (Hacienda la Margarita, Cabo Rojo 1, Cabo Rojo 2, Cabo Rojo 3, Club de Leones, and Ana Maria) and one surface water source which serve an estimated population of 46,911 people]. The Ana Maria well acts as an independent system which serves approximately 1,856 persons; the other components are blended to serve approximately 45,055 persons. Quarterly ground water samples collected by the system's operator, Puerto Rico Aqueduct and Sewer Authority, indicate that the chlorinated solvents tetrachloroethylene (PCE) and trichloroethylene (TCE) were detected in samples collected from the Hacienda la Margarita well in 2004 and 2005 and on numerous occasions in samples collected from the Ana Maria well from 2002 to 2006. PCE was detected in ground water samples collected from the Ana

Maria well at concentrations ranging from 1.8 micrograms per liter (µg/L) to 4.0 µg/L and TCE was detected at concentrations ranging from 0.5 µg/L to 1.6 µg/L.

Purpose of the WA is to perform the RI/FS for OU #1 to investigate the overall nature and extent of contamination and develop remedial alternatives at the Cabo Rojo Groundwater Contamination ("the Site"), Municipality of Cabo Rojo, Puerto Rico.

Potential Responsible Parties - for COI

Town of Cabo Rojo, PR 00623

D'Elegant Dry Cleaners (AKA: Papa Dry Cleaners, Modern Dry Cleaners)- Carr 308 Km 0.1 Int Carr 100 (located at the small strip mall on Carr. 308 off Carr. 100)

Extasy Q Print - Centro Comercial Ana Maria Located on a small strip mall @ the entrance of Ana Maria Urbanization

Cabo Rojo Professional Dry Cleaners – 50 Carbonell Street. (787) 851-8590

Subject: New RI/FS WA --Cabo Rojo GW site ----Information needed for COI check

Denise

Attached is a RI/FS SOW that you can use for an example, you will also need to provide IGCE assumptions for the project. --Has money been allocated for this project???

[attachment "matteo-RIFS.doc" deleted by Denise Zeno/R2/USEPA/US]

Could you please provide the information below on your site to start the COI process.

Site Name:

Site Address:

Some basic history & Purpose of the WA - for example, facility operated as a rubber manufacturer from years 1890 - 1990, during this period
-- can get this information from the pre-remedial information/reports.....

Purpose of this WA is to perform the RI/FS for OU #1

Potential Responsible Parties - list any known parties and potential parties.

Thanks, Helen
